

CERAMIT CN 464 Z

Heavy and stiff ceramic grain abrasive cloth

Product Benefits

- Highly economical due to low overall grinding costs
- Hard and sharp ceramic grain provides high stock removal rate and long tool life
- Very good grit adhesion even at high grinding pressure in the centre as well as on the edges
- Stiff, highly tear-resistant and waterproof Z-Polyester backing assures an optimal belt stability

Applications

- High-performance grinding of all metals, especially corrosion- and acid-resistant stainless steels, tool steels, Ni- and Co-based alloys, titanium
- Economical grinding of forgings, blanks and castings
- Suitable for grinding operations with high pressure
- Recommended for use with cooling lubricants

Product Structure

Type	46440
Grain	Ceramic grain
Bonding	Resin
Backing	Z-cloth
Coating	closed
Grit range	+ 36 - + 40, + 60, + 80

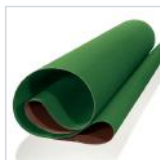

Metal

- Very suitable
- Suitable

Forms of Delivery

Abrasive belts

Wide belts
